Emily Y. Zhang

emilyyzhang.github.io ⋄ (913) · 486 · 0898 ⋄ eyzhang@mit.edu

Education

Massachusetts Institute of Technology Cambridge, MA
Ph.D. Student in Operations Research, GPA: 5.0/5.0 September 2021 – Present
Advised by Prof. Georgia Perakis and Prof. Retsef Levi

Massachusetts Institute of Technology Cambridge, MA
B.S. in Computer Science & Mathematics, GPA: 5.0/5.0 September 2017 – June 2021

Papers

1. **An Upper and Lower Bound for the Convergence Time of House-Hunting in *Temnothorax* Ant Colonies.**
   Emily Zhang, Jiajia Zhao, and Nancy Lynch, *Journal of Computational Biology* **29**(4) (2022), 344–357.

2. **On the Broadcast Dimension of a Graph.**
   Emily Zhang, `arXiv:2008.01056 [math.CO]`, 2020.

3. **Extremal Pattern-Avoiding Words.**
   Natalya Ter-Saakov and Emily Zhang, `arXiv:2009.10186 [math.CO]`, 2020.

4. **CDFShop: Exploring and Optimizing Learned Index Structures.**
   Ryan Marcus, Emily Zhang, and Tim Kraska, *ACM SIGMOD* 2020.

5. **On the Stability of Optimization Algorithms Given by Discretizations of the Euler-Lagrange ODE.**
   Rachel Walker and Emily Zhang, `arXiv:1908.10426 [math.OC]`, 2019.

Research Experience

MIT Operations Research Center (ORC) Cambridge, MA
Doctoral Research Assistant Sept 2021 – Present

- Developing new analytical methods with applications to food waste reduction and other related issues.
- Designing interventions for social good.

MIT Computer Science & Artificial Intelligence Laboratory (CSAIL) Cambridge, MA
Undergraduate Researcher in the Theory of Distributed Systems Group Aug 2020 – Aug 2021

- Analyzed the house-hunting process in ant colonies from a distributed computing perspective to inspire swarm robotics research.
- Proved theoretical guarantees on the consensus time and conformity of an agent-based model for house-hunting.
- Presented results at the 8th workshop on Biological Distributed Algorithms.

Duluth Research Experience for Undergraduates (REU) Duluth, MN
Undergraduate Researcher Summer 2020

- Derived an asymptotically optimal lower bound on the broadcast dimension of acyclic graphs and proved that edge deletion can both increase and decrease broadcast dimension by an arbitrarily large amount.
- Presented results at the 2020 American Mathematical Society Fall Virtual Sectional Meetings.

MIT CSAIL — Cambridge, MA

Undergraduate Researcher — Sept 2019 – Dec 2019

- Explored the potential of the recursive model index (RMI), a learned index structure tuned to a user's data by machine learning, to outperform traditional index structures in the task of searching over sorted data.
- Built an RMI optimizer on top of the existing RMI codebase.

Georgia Tech Mathematics REU — Atlanta, GA

Undergraduate Researcher — Summer 2019

- Researched accelerated gradient-based convex optimization algorithms, based on discretizing continuous-time curves converging to the optimum.
- Presented results at the 2019 Young Mathematicians Conference.

MIT Media Lab — Cambridge, MA

Undergraduate Researcher in the Molecular Machines Group — Jan 2019 – Feb 2019

- Parsed the scientific citation network to extract features that indicate early signs of highly-impactful ideas.
- Created visualizations to understand how infectious ideas are spread across communities.

MIT Media Lab — Cambridge, MA

Undergraduate Researcher in the Personal Robots Group — Summer 2018

- Designed and developed literacy games using Unity and C#.
- Implemented a data tracking system that tracks children's learning performance and interaction history with a social robot and the literacy games.

Summer Science Program — Socorro, New Mexico

Student Researcher working on Asteroid Orbit Determination — Summer 2016

- Observed the near-earth asteroid 1999 ML with the C-14 telescope at Etscorn Observatory.
- Determined the orbit of 1999 ML using original photometry, astrometry, and Method of Gauss orbit determination code.

Teaching Experience

- **Grader** at MIT Department of Mathematics — Spring 2020
  Probability and Random Variables (18.600)
- **Laboratory Assistant** at MIT Department of EECS — Fall 2019
  Introduction to Machine Learning (6.036)

Extracurricular Activities

MIT Undergraduate Society of Women in Mathematics (USWIM) — Cambridge, MA

Publicity Chair — 2019 – 2021

- Hosted career-oriented events, outreach events, and social events for female-identifying and nonbinary students interested in math.
- Mentored underclassmen who are interested in majoring in mathematics.

MIT Society of Women Engineers (SWE) — Cambridge, MA

Board Member & Technology Chair — 2019 – 2020

- Planned and hosted campus-wide technology workshops.
- Oversaw SWEcubator, a program that provides mentorship, resources, and funding to help SWE members start new engineering initiatives.
